

Package ‘muSpaData’

November 13, 2025

Version 1.2.0

Title Multi-sample multi-group spatially resolved transcriptomic data

Description Data package containing a multi-sample multi-group spatial dataset in SpatialExperiment Bioconductor object format.

URL <https://github.com/peicai/muSpaData>

Wei22_example

Wei22_example *dataset*

Description

- A subset of the Wei22_full dataset, focusing on fewer regeneration stages.
- It includes 2 (2 sections), 10 (2 sections), and 20 (2 sections) days post injury (DPI).
- The original data is deposited in the Spatial Transcript Omics DataBase (STOmics DB) under dataset id STDS0000056.

Usage

```
Wei22_example(metadata = FALSE)
```

Arguments

metadata	A logical value indicating whether to return only the ExperimentHub meta-data, which describes the overall dataset, or to load the entire dataset. Defaults to FALSE.
----------	---

Details

link to reference: <https://www.science.org/doi/10.1126/science.abp9444>

link to raw data: <https://db.cngb.org/stomics/artista/download/>

Value

an object of class SpatialExperiment.

Author(s)

Peiying Cai <peiyong.cai@uzh.ch>

References

Wei et al. (2022). "Single-cell Stereo-seq reveals induced progenitor cells involved in axolotl brain regeneration", *Science*, **377**(6610).

Examples

```
# load metadata only
Wei22_example(metadata = TRUE)

# load SpatialExperiment
Wei22_example(metadata = FALSE)
```

`Wei22_full``Wei22_full dataset`

Description

- Single-cell Stereo-seq spatial transcriptomics data includes axolotl brain tissues collected from multiple sections across five regeneration stages (16 samples in total)
- The dataset contains 13890 features across 147432 cells, and preprocessing has been applied.
- The original data is deposited in the Spatial Transcript Omics DataBase (STOmics DB) under dataset id STDS0000056.

Usage

```
Wei22_full(metadata = FALSE)
```

Arguments

<code>metadata</code>	A logical value indicating whether to return only the ExperimentHub metadata, which describes the overall dataset, or to load the entire dataset. Defaults to FALSE.
-----------------------	--

Details

link to reference: <https://www.science.org/doi/10.1126/science.abp9444>

link to raw data: <https://db.cngb.org/stomics/artista/download/>

Value

an object of class `SpatialExperiment`.
